The Equipment Rental App

Project by: Apurva Patel,
Lauren Kirkley,
Jameson Evans

Possible use cases

- You and your roommates live in an old house near campus. One day, you wake up to find a drunk guy threw a lawn chair on your roof. How will you get it off?
- A storm knocks tons of leaves off all the trees around your house. How will you clean up the mess?
- You want to pressure wash your porch but you don't have a pressure washer. Is it worth purchasing one?

Don't want to buy it, so RENT!

Our Idea

- An app that allows users to rent equipments from other users.

- It will allow users to find items people around them who already own it and to rent it from them.

    - Examples: Ladders, Leaf Blowers, Lawn Mowers, Boats, Tools, BBQ Grill, etc.

Competitors?

- We have not been able to find a similar app in AppStore or PlayStore.

- All apps that we have found are businesses, and to rent from them you must go to their physical location.

- Established rental companies: Home Depot, Uhaul, Legacy Rental.

Snapshot of prices...

18 Ga Brad Nailer

DESCRIPTION

Some business related stuff...

We will let users to set rental price for their equipment.

We will charge 50% of the total upfront when the equipment is marked as picked up.

Another 40% at the time of drop off, and 10% will be our service charge.

For equipment safety, we will hold some initial amount on renter's credit card once equipment is marked as picked up.

Aim is to build an app which is…

Easy to use.

Easy to find cheaper equipment.

Easy for Users to loan their equipments and earn money.

And an app that works with all screen sizes.

Four quadrants

1. Design navigation screens and routing between different tabs and screens.
2. Implementing an app related logic and testing.
3. Connecting with Database and testing.
4. Improving UIs.

Difficulties

Making sure that app works with iOS and Android for all screen sizes.

Get the ball rolling.

UI designing.

Transaction related features.

Many features to divide between 3 of us.

Features/Work for 3

Primary Features

1) User Authentications
2) Account details
3) Usable for all screen sizes
4) Clear Communication
   a) User able to post equipments for rent
   b) User able to rent equipment
5) Easy transaction related features
6) Rate/Review/comments
7) Safety Agreements & Responsibilities.

Extras

1) See previously rented equipments
2) Create a waitlist
3) Search related: Categorical and Keyword
4) Link or guide about how to use that equipment
5) UIs related features.
6) Implement Payment related features.
7) And more… :D

Thank you!
